Thitipong Saelim

Project Manager | ERP delivery for growing companies

Bangkok · thitipong.saelim@example.com

Summary

Project manager for 3 years at a digital consultancy, and a product owner before that. I like ERP projects where the business is still deciding how it wants to work, because that is where a clear plan and good workshops make the biggest difference. I work in short phases with regular demos so clients see progress early.

Experience

Project Manager Ardent Loop Digital Co., Ltd. Jun 2023 – Present

- Led the Odoo ERP rollout end to end for a 400-person client, covering sales, inventory, purchasing and accounting.
- Led change management and user training for the same client: 18 key users, a train-the-trainer programme and short how-to videos in Thai.
- Run 3–4 client projects at a time with a team of 6 consultants and developers.
- Introduced fixed-scope phases and fortnightly demos, which cut change requests by about a third.

Product Owner Copperkite Software Co., Ltd. Jan 2020 – May 2023

- Owned the backlog for a cloud HR and payroll product used by 120 client companies.
- Wrote user stories, ran sprint reviews with 2 Scrum teams and set release priorities with sales and support.
- Interviewed customers every month to shape the product roadmap.

Education

M.Sc. Software Engineering, Chulalongkorn University, 2019

B.Sc. Computer Science, Prince of Songkla University, 2017
