Apichart Siriprapha

Software Development Lead

Bangkok · apichart.siriprapha@example.com

Summary

Software development lead who builds the integrations that let business systems work together. I lead developers, design APIs and sit with business analysts so that data flows correctly from the first day. I am good at explaining technical trade-offs to managers, and I would like to move from building systems to running the programmes around them.

Experience

Software Development Lead Copperkite Software Co., Ltd. May 2017 – Present

- Built integrations for a Salesforce CRM rollout at a client, connecting Salesforce to the client's billing, order and customer-service systems.
- Lead a team of 8 developers: technical design, code reviews, hiring and quarterly performance reviews.
- Designed the company's API platform, which now supports 30 client integrations and handles about 2 million calls a day.
- Halved production incidents by introducing automated testing, release checklists and monitoring dashboards.

Software Engineer Silverpine Telecom Co., Ltd. Jun 2013 – Apr 2017

- Developed and maintained Java services for the billing and customer-care systems used by 5 million subscribers.
- Built reports and data feeds for the finance and marketing teams.
- Took part in the on-call rota for the billing platform during month-end runs.

Education

B.Eng. Computer Engineering, King Mongkut's University of Technology Thonburi, 2013

Languages

Thai (native) · English: IELTS 7.0 (2022)
